University of South Florida 📅 08/1998 - 05/2003 📍 Tampa, FL

CORE TECHNICAL SKILLS

.NET Framework - C#

SSIS

SSRS

SSAS

KEY PROJECTS/SYSTEMS

Scorecard/Dashboard

- Under my leadership, my team delivered the first metrics driven scorecard at Ryder for key areas of the business, primary technologies used were SSRS, SSIS, SSAS, Sharepoint and Power BI
- This project has changed the culture of the business as all activities are geared towards improving key performance indicators on the scorecard which in turn have a major impact on the bottom line.
- I also introduced the scorecard within the IT organization, first on my team, and then a phased approach to the entire org. This started a cultural transformation.

Kiosk Payment Station

- Actively lead the team towards creating a new application for payment software running on a windows kiosk. The system was used primarily in parking garages globally. The technology used was .NET WPF front end connecting to backend services written in PHP with MySQL db. The backend runs on the cloud using AWS.

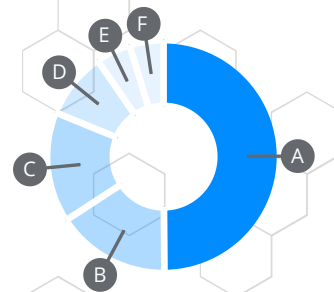

Corporate Website

- Led the team towards the rebranding and creation of key customer facing websites such as www.ryder.com, usedtrucks.ryder.com, and reservations.ryder.com, primary technologies were Sitecore and .NET

SalesForce Legacy App Integration

- Under my leadership, worked with third party salesforce team and internal employees to migrate from a legacy call center application into salesforce. Due to legacy concerns, some items were also integrated between legacy and salesforce to maintain backend continuity. Primary technology used was BizTalk, salesforce (APEX), .NET, SQL Server, etc.

MY TIME

- A** 50% - Managing a large team of business analysts, developers, architects, tech leads, and project managers with focus on process, execution, scope, and budget
- B** 15% - Active on SSIS, SSRS, SSAS, Sharepoint, and .NET Development
- C** 15% - Meetings & Collaboration
- D** 10% - Keeping up with technology
- E** 5% - Executive reviews and presentations
- F** 5% - Strategic and tactical preparation for IT transformation
